

ROBOTIC CLEANER TORNADO ROBOSKI USISAVAC TORNADO

VAGNER POOL

SWIMMING POOL TECHNOLOGY

Robotic cleaner TORNADO Roboski usisavač TORNADO

Characteristics

The automatic robotic vacuum cleaner suitable for use in private pools of any shape and sticky PVA brushes allow use in pools with slippery surfaces, such as polypropylene or mosaic tiles.

Efficiency

Tornado robotic cleaners feature 4 brushes made of a PVA specially formulated to be compatible with all pool surface finishes. Along with the additional vibrating PVC brush, they provide impeccable cleaning of your pool. A powerful pump and 2 motors make it possible to effectively clean all parts of the pool, such as the bottom, walls or level line (depending on the model).

Cleaning cycle

SMART NAVIGATION – is an intelligent pool cleaning program that learns the shape of the pool. Thanks to the built-in gyroscope and the rotating pin, the risk of tangling the floating cable are minimized.

Filtration ability

Ultra-fine filter guarantees up to 4x more efficient capture of dirt than standard filters. The filter fibers are woven into 4D loops, which prevents clogging and jamming of dirt on the filter walls.

Karakteristike

Automatski robotski usisavač pogodan za korištenje u privatnim bazenima bilo kojeg oblika. PVA četke omogućuju korištenje čak i na bazenima s klizavom površinom, poput polipropilena ili mozaika.

Učinkovitost

Tornado automatski robotski usisavači opremljeni su s četiri PVA četkom i dodatnom vibrirajućom PVC četkom na dnu korpusa, čime se osigurava savršeno čist bazen. Snažna pumpa i 2 motora omogućuju učinkovito čišćenje svih stranica bazena poput dna, stijenki ili vodene linije (ovisno o modelu).

Program za čišćenje

SMART NAVIGATION – je inteligentni program za čišćenje bazena koji mapira oblik bazena. Zahvaljujući ugrađenom žiroskopu i rotirajućem kabelskom konektoru, rizik od zapetljanja plutajućeg kabela je sveden na minimum.

Kapacitet filtera

Ultra-fini filter jamči do 4x učinkovitije hvatanje nečistoća u usporedbi s standardnim filterima. Vlakna filtra su utkana u 4D petlje, čime je spriječeno začepljenje i nakupljanje prljavštine na stijenkama filtera.

TORNADO 500 LITE

TORNADO 600

Technical data:

- ▶ Ultra-fine filter
- ▶ Intelligent cleaning program
- ▶ Transparent lid for easy filter inspection
- ▶ Vibrating brush

Tehnički podaci:

- ▶ Ultra-fini filtar
- ▶ Inteligentni program čišćenja
- ▶ Prozirni poklopac za jednostavnu inspekciju filtera
- ▶ Vibrirajuća četka

Reference code / Šifra proizvoda	60642	60643
Model	TORNADO D500LITE	TORNADO D600
Max pool dimensions (m) / Maksimalne dimenzije bazena (m)	15 x 6	15 x 6
Cable length (m) / Duljina kabela (m)	16,0	18,0
Cleaning cycle Program za čišćenje	Floor, walls, water-line Dno, zid, vodena linija	Floor, walls, water-line Dno, zid, vodena linija
Swivel / Okretni kabelski konektor	✓	✓
Setting the length of the cycle / Postavljanje duljine ciklusa	2 h	1,5 h/2 h/2,5 h
Full-filter indicator / Indikacija punog filtera	-	✓
Remote control (Bluetooth) / Daljinski upravljač (Bluetooth)	-	✓ - App
Suction flow rate / Performanse pumpe	19 m ³	19 m ³
Trolley / Transportna kolica	-	✓
Number of motors / Broj motora	2	2
 KG	11	11

The appearance of the vacuum cleaner is underlined by an effective LED backlight, which lights up throughout the cleaning program.

Izgled usisavača naglašen je efektним LED pozadinskim osvjetljenjem koje svijetli kroz cijeli program čišćenja.
